THE GEOMETRY OF PASTA

OUR STORY

There are said to be more than 300 shapes of pasta in Italy, each of which has its own unique history and story to tell. These shapes evolved in harmony with locally available ingredients, giving them an affinity with particular foods and ensuring the perfect pasta shape for every recipe. As all Italians know, the ideal combination of pasta and sauce can turn an ordinary dish into an extraordinary gastronomic experience.

PASTA SHAPES + SAUCES BY REGION

As you travel through Italy from top to toe, the quality and form of its pasta changes with every region. In the poorer south, simple semolina and water paste is fashioned by hand into chunky shapes, while in more central regions durum wheat dough is extruded by machine into more complex forms to be slowly dried at low temperatures. Towards the more affluent north, expensive egg yolks lend a golden-yellow hue to finer, more crafted shapes, whereas in the borderlands, where German and Eastern European influences prevail, breadcrumbs, chestnuts, buckwheat and rye regularly replace wheat.

The Geometry of Pasta ranges are inspired by the Italian preoccupation with finding the right pasta shape for the right sauce. Our perfectly put-together collection draws on the best of Italian regional cuisine – from authentic bronze-drawn pasta to celebrated wild game sauces – and is made from the finest ingredients in the heart of Italy. By bringing together some of Italy’s best artisan pasta producers and gourmet sauce makers for the first time, we hope to elevate pasta and sauce to something truly sublime.
